

Feel at home. Even when you're not.

It's your home away from home - and whether it's on the beach, by a lake, or right next to the ski slopes, it's an investment as dear to you as your primary residence.

HomeLogic's Remote Home Management package is all you need to ensure that your second home is not only secure while you're away, but that it's also running as efficiently as possible.

HomeLogic gives you instant status of your second homes' well-being from any PC, laptop, Windows Smart Phone, or even your iPhone® or iPod touch®! With them you can **remotely** . . .

- **Arm, disarm and monitor the status of your security system**
 - **Receive e-mail and phone alerts**
 - **Search and view security camera video from a timeline**
 - **Monitor and control temperature settings**
 - **View security system events history and temperature trend-lines over time**
 - **Turn on or off interior and exterior lighting**
 - **Set lawn and garden irrigation schedules**
-and much more

HomeLogic's GREEN control features help you do your part to save natural resources, lowering your carbon footprint while saving you money each and every month.

Especially great for rental properties, HomeLogic allows you to make sure that home, pool and spa temperature settings are just right when renters arrive and set back after they leave. You can even receive e-mail alerts when temperatures get too hot or too cold.

Secure.
Comfortable.
Efficient.
Easy.

HOMELOGIC®

INTELLIGENT HOME CONTROL

Have peace of mind in knowing that your second home or rental property is in the best of hands. Yours. Wherever you happen to be.

*Features vary depending on components selected for installation. Consult your authorized HomeLogic Dealer for the feature set that's right for you and your Home Management needs.

REMOTE HOME Management Systems

SECURITY • CLIMATE • SURVEILLANCE • LIGHTING

A HOMELOGIC REMOTE HOME MANAGEMENT SYSTEM CAN PROVIDE YOU WITH:

- Remote access to security system control, monitoring and history
- Remote access to climate control, monitoring and history
- Control of all sub-systems from a PC, laptop, Windows® Smart phone, iPhone®, or iPod touch®
- E-mail alerts of security breaches, low/high temperature alarms, water sensors, lighting on/off and more
- View up to 2 IP security cameras over the Internet
- Automation and control of interior and exterior lighting
- Automation between systems (i.e. security breach triggers lights/ fire alarm, shuts off HVAC and turns on pathway lights)

FOR ADDED SECURITY, HOMELOGIC OFFERS A PEACE-OF-MIND UPGRADE PACKAGE THAT GIVES YOU ALL OF THE ABOVE *PLUS...*

- Monitor up to 16 IP or CCTV security cameras over the Internet
- Record up to any 4 cameras at one time
- Retrieve recorded video via the Internet
- Receive e-mail alerts when video is recorded
- Automated video recording triggered by security system events or motion detected by camera
- Provides a home network

The cost of both systems will vary depending on the features you select and the extent of the lighting, climate and security systems you think will best suit your needs. Cost of labor not included.

 Call us today to find out how we can help you spec and configure just the right products for all your Home Control applications.
